## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 11-14 and 21 are rejected under 35 U.S.C. 102(b) as being anticipated by DE19720652A1.

DE19720652A1 shows and describes laser heating of a turbine component.

Heating is performed with a plurality of lasers and from at least two irradiation directions.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to

consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 15 and 16 are rejected under 35 U.S.C. 103(a) as being unpatentable over DE19720652A1 as applied to claims 11 and 14 above, and further in view of JP407185852A.

JP407185852A shows a plurality of laser beams irradiating a substrate at different angles and the modification of DE19720652A1 would have been obvious at the time applicant's invention was made to a person having ordinary skill in the art because different angles are suitable for different workpiece shapes.

Claims 17-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over DE19720652A1 as applied to claims 11, 14, and 17 above, and further in view of US20080053972A1 to Otsu et al.

Otsu et al describe (e.g., claim 7) measuring and adjusting and the use thereof would have been obvious at the time applicant's invention was made to a person having ordinary skill in the art because it provides feedback and control of the process.

Claim 21 is rejected under 35 U.S.C. 103(a) as being unpatentable over DE19720652A1 as applied to claim 11 above, and further in view of KR2001068666A.

KR2001068666A describes laser hardfacing and the use thereof would have been obvious at the time applicant's invention was made to a person having ordinary skill in the art because a reconditioned part is cost efficient.

Claim 22 is rejected under 35 U.S.C. 103(a) as being unpatentable over DE19720652A1 in view of US20080053972A1 to Otsu et al as applied to claim 19 above, and further in view of KR2001068666A.

KR2001068666A describes laser hardfacing and the use thereof would have been obvious at the time applicant's invention was made to a person having ordinary skill in the art because a reconditioned part is cost efficient.

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
